

ColorFlare Consumables

ColorFlare consumables are manufactured directly for Intec. They offer class leading affordability, providing you with some of the most technically advanced laminate and foils available today, ensuring you the highest quality results on your lithographic and digital prints. And the foils are recyclable and compostable and is removed when paper is being deinked.

Foils and films - A range of coloured flaring foils and films to add special effects to your print

Foils and Films

Description Our Premium Flaring Foils, will bond to any toner on the sheet enabling you to add metallic or other special effects to your print - ideal for high quality brochures, wedding stationary, labelling, packaging and so much more. They do not require the surface to be pre-treated and do not require the surface to be laminated. However, if you wish to add spot metallic or holographic effects onto a printed page, then you may need to print your image first, then protect this image with clear over-printable digital laminate - so you can then over print the area of image that you wish to apply the foil or metallic effect to.

Metallic Foils

Can be over printed after imaging. Can be applied directly to printed image when laminating is not desired - i.e. where you print the metallic parts first - then the sheet can be over printed for the addition of other colours. Alternatively can also be applied to images

Specification

300 metre roll length
320mm (12.6") width
3" (77mm) core

CFMETGLD

Gold Metallic Flaring Foil

CFMETBLU

Blue Metallic Flaring Foil

CFMETSIL

Silver Metallic Flaring Foil

CFMETCPP

Green Metallic Flaring Foil

Metallic Foils Multi-Pack

An extremely affordable way to experiment with a wider range of colours.

Multi-Pack contains:

Silver, Copper, Rose Gold, Red, Green, Blue and White

Specification: 50 metre roll length, 320mm (12.6") width, 77mm (3") core.

Stock code: CFMETFMP

Films

Spot Gloss films cannot be over printed.
These should be the last effect placed on a sheet.

CFGLOSSWH

White Gloss Flaring Film

CFGLOSSCL

Clear Gloss Flaring Film

CFGLOSSBL

Black Gloss Flaring Film

Specification

300 metre roll length
320mm (12.6") width
3" (77mm) core

Holographic Films

Holographic films cannot be over printed.
These should be the last effect placed on a sheet.

CFHOLSP1

Sparkle Holographic Film

CFHOLCF1

Carbon Fibre Holographic Film

CFHOLCR1

Crystal Holographic Film

Specification

100 metre roll length
320mm (12.6") width
3" (77mm) core

Laminates

MegaBond+ Digital Laminates

Description

Premium laminating films designed for digital toner based prints. Uses the MegaBond+ adhesive system which provides a significantly higher bonding strength than standard OPP litho laminating films. MegaBond+ adhesive also includes proprietary additives designed to penetrate the oils/waxes found in digital toners, ensuring a perfect bond without

Application

Premium digital print applications where toner based imaging devices are used. Suitable for high coverage toner based prints, available in gloss or matt finishes with varying thicknesses. Use where confidence is required to ensure your bond is firm on digital print and you require a premium finish. Can also be used on litho output.

Range stock codes

CFMBGLOSS25
Gloss 25 micron laminate
CFMBMATT26
Matt 26 micron laminate

Specification

1,000 metre roll length
315mm (12.4") width
3" (77mm) core

MegaBond+ Over-Printable Digital Laminates

Description

High temperature, premium laminating films, that have been coated with a surface treatment that enables a high key over printable surface. Specifically designed for digital toner based prints, uses the MegaBond+ adhesive system providing a significantly higher bonding strength than standard OPP litho laminating films. MegaBond+ adhesive also includes proprietary additives designed to penetrate the oils/waxes found in digital toners,

Application

The laminating film of choice for users who wish to add additional effects to full colour digital prints, such as metallic foil or spot UV films. Suitable for high coverage toner based prints, available in a soft touch, silk finish with varying thicknesses. Specifically designed where over printing is required, as the high temperature surface can be
